

# POWER PLANT

INNOVANTA

Company Number 16820  
INNOVANTA GUYANA INC.

# WHO WE ARE?

---

INNOVANTA is a company specialized in Design, Engineering, and Construction, focusing primarily on the Energy Industry. We stand out for our specialized approach tailored to the needs of our clients.

Our self-generation projects using gas, alternative Energies, energy efficiency programs, and emission reduction are designed to optimize sustainability and operational effectiveness.

# OUR PEOPLE

---

Our team is composed of professionals with over 30 years of experience in various engineering disciplines for the identification, formulation, and execution of complex engineering projects supported by innovation, science, and technology

INNOVANTA provides global coverage to its clients through national and international strategic alliances. Our network of elite collaborators drives innovation, ensuring business success at every stage.

# Gas powerplant Concept 300MW

- ✓ Gas turbine units: (e.g. 100MW or 50MW each).
  - ✓ Heat Recovery Steam Generators (HRSG)
  - ✓ Fuel Supply System
  - ✓ Storage Facilities, Cooling System, Cooling Towers, Water Supply
  - ✓ Electrical Infrastructure
  - ✓ Transformers (e.g. 100MW each).
  - ✓ Switchgear
  - ✓ Transmission Lines
  - ✓ Substations Advanced monitoring and automated control systems
- 
- ✓ Footprint estimated : 4 hectares
  - ✓ KPI approx.: 2.2mUSD per MW installed

# THANKS!
